

CYBERSECURITY

Complete Learning Roadmap

Protect infrastructure and applications through offensive testing and defensive controls.

Learning Path Overview

Five progressive stages from fundamentals to production mastery

01

Fundamentals

CIA triad • Threat modeling • Network basics • Security hygiene

02

Core Concepts

Web vulnerabilities • Auth and access controls • Security testing • Logging fundamentals

03

Tools and Frameworks

Burp Suite • SIEM tools • Vulnerability scanners • Cloud security controls

04

Real Projects

Secure coding audit • Incident response drill • Threat hunting mini-lab • Hardening checklist

05

Advanced Topics

Zero trust architecture • Advanced detection engineering • Red-blue exercises • Compliance automation

How to Use This Roadmap

Build and ship first

Complete a small working project in every stage before advancing.

Use official sources

Start with the docs and use secondary resources to reinforce implementation patterns.

Iterate on projects

Refactor earlier work as you learn better architecture, testing, and performance habits.

Stages 01 & 02 - Deep Dive

Fundamentals, core concepts, and architectural foundations

01

Stage 1 - Fundamentals

Estimated: 3-4 weeks | Prerequisites: Basic foundations

Topics

- CIA triad
- Threat modeling
- Network basics
- Security hygiene

Tools & Frameworks

- CIA triad
- Threat modeling
- Network basics
- Security hygiene

Recommended Projects

- Cybersecurity workshop using CIA triad
- Cybersecurity portfolio project with Threat modeling

Stage 1 Milestone Complete Cybersecurity workshop using CIA triad and document the decisions, trade-offs, and validation checks before moving to Stage 2.

02

Stage 2 - Core Concepts

Estimated: 4-5 weeks | Prerequisites: Stage 1 complete

Topics

- Web vulnerabilities
- Auth and access controls
- Security testing
- Logging fundamentals

Tools & Frameworks

- Web vulnerabilities
- Auth and access controls
- Security testing
- Logging fundamentals

Recommended Projects

- Cybersecurity workshop using Web vulnerabilities
- Cybersecurity portfolio project with Auth and access controls

Stage 2 Milestone Complete Cybersecurity workshop using Web vulnerabilities and document the decisions, trade-offs, and validation checks before moving to Stage 3.

Stages 03 & 04 - Deep Dive

Modern tooling, delivery frameworks, and portfolio projects

03

Stage 3 - Tools and Frameworks

Estimated: 4-6 weeks | Prerequisites: Stage 2 complete

Topics

- Burp Suite
- SIEM tools
- Vulnerability scanners
- Cloud security controls

Tools & Frameworks

- Burp Suite
- SIEM tools
- Vulnerability scanners
- Cloud security controls

Recommended Projects

- Cybersecurity workshop using Burp Suite
- Cybersecurity portfolio project with SIEM tools

Stage 3 Milestone Complete Cybersecurity workshop using Burp Suite and document the decisions, trade-offs, and validation checks before moving to Stage 4.

04

Stage 4 - Real Projects

Estimated: 6-8 weeks | Prerequisites: Stage 3 complete

Topics

- Secure coding audit
- Incident response drill
- Threat hunting mini-lab
- Hardening checklist

Tools & Frameworks

- Secure coding audit
- Incident response drill
- Threat hunting mini-lab
- Hardening checklist

Recommended Projects

- Cybersecurity workshop using Secure coding audit
- Cybersecurity portfolio project with Incident response drill

Stage 4 Milestone Complete Cybersecurity workshop using Secure coding audit and document the decisions, trade-offs, and validation checks before moving to Stage 5.

Stage 05 - Advanced Topics & Delivery

Performance, architecture, release automation, and production governance

05

Stage 5 - Advanced Topics

Estimated: Ongoing | Industry-grade operating habits

Advanced Focus

- Zero trust architecture
- Advanced detection engineering
- Red-blue exercises
- Compliance automation

CI/CD Pipeline

Stage 5 Milestone

A production-grade cybersecurity workflow with measurable performance, quality, and release confidence.

Performance Budget

Set and track concrete engineering thresholds: startup latency, error budget, throughput, cost efficiency, and deployment confidence.

Resources & Practice Questions

Verified links, self-assessment, and community follow-up

FREE

Cybersecurity docs and community guides

Self-Assessment Practice Questions

- How would you evaluate readiness for Stage 3 in Cybersecurity?
- Which project best proves Stage 4 competency in Cybersecurity?
- What trade-offs appear in Stage 5 decisions for Cybersecurity?
