

# FULL STACK DEVELOPMENT

## Complete Learning Roadmap

Connect user-facing interfaces with secure backend services and reliable deployment pipelines.

# Learning Path Overview

Five progressive stages from fundamentals to production mastery

01

## Fundamentals

Web fundamentals •  
Client-server model • Version  
control • Database basics

02

## Core Concepts

SPA architecture • REST  
integration • Auth sessions •  
Form and state handling

03

## Tools and Frameworks

React and Node stack

04

## Real Projects

Production CRUD platform •  
Role-based dashboard •  
Realtime notifications •  
Analytics integration

05

## Advanced Topics

Scalable architecture • Cost  
optimization • Security  
hardening • Team-level coding  
standards

### How to Use This Roadmap

#### Build and ship first

Complete a small working project in every stage before advancing.

#### Use official sources

Start with the docs and use secondary resources to reinforce implementation patterns.

#### Iterate on projects

Refactor earlier work as you learn better architecture, testing, and performance habits.

# Stages 01 & 02 - Deep Dive

Fundamentals, core concepts, and architectural foundations

## 01

### Stage 1 - Fundamentals

Estimated: 3-4 weeks | Prerequisites: Basic foundations

#### Topics

- Web fundamentals
- Client-server model
- Version control
- Database basics

#### Tools & Frameworks

- Web fundamentals
- Client-server model
- Version control
- Database basics

#### Recommended Projects

- Full Stack Development workshop using Web fundamentals
- Full Stack Development portfolio project with Client-server model

**Stage 1 Milestone** Complete Full Stack Development workshop using Web fundamentals and document the decisions, trade-offs, and validation checks before moving to Stage 2.

## 02

### Stage 2 - Core Concepts

Estimated: 4-5 weeks | Prerequisites: Stage 1 complete

#### Topics

- SPA architecture
- REST integration
- Auth sessions
- Form and state handling

#### Tools & Frameworks

- SPA architecture
- REST integration
- Auth sessions
- Form and state handling

#### Recommended Projects

- Full Stack Development workshop using SPA architecture
- Full Stack Development portfolio project with REST integration

**Stage 2 Milestone** Complete Full Stack Development workshop using SPA architecture and document the decisions, trade-offs, and validation checks before moving to Stage 3.

# Stages 03 & 04 - Deep Dive

Modern tooling, delivery frameworks, and portfolio projects

## 03

### Stage 3 - Tools and Frameworks

Estimated: 4-6 weeks | Prerequisites: Stage 2 complete

#### Topics

- React and Node stack
- Testing stack
- CI workflows
- Cloud deployment tooling

#### Tools & Frameworks

- React and Node stack

#### Recommended Projects

- Full Stack Development workshop using React and Node stack
- Full Stack Development portfolio project with Testing stack

**Stage 3 Milestone** Complete Full Stack Development workshop using React and Node stack and document the decisions, trade-offs, and validation checks before moving to Stage 4.

## 04

### Stage 4 - Real Projects

Estimated: 6-8 weeks | Prerequisites: Stage 3 complete

#### Topics

- Production CRUD platform
- Role-based dashboard
- Realtime notifications
- Analytics integration

#### Tools & Frameworks

- Production CRUD platform
- Role-based dashboard
- Realtime notifications
- Analytics integration

#### Recommended Projects

- Full Stack Development workshop using Production CRUD platform
- Full Stack Development portfolio project with Role-based dashboard

**Stage 4 Milestone** Complete Full Stack Development workshop using Production CRUD platform and document the decisions, trade-offs, and validation checks before moving to Stage 5.

# Stage 05 - Advanced Topics & Delivery

Performance, architecture, release automation, and production governance

05

## Stage 5 - Advanced Topics

Estimated: Ongoing | Industry-grade operating habits

### Advanced Focus

- Scalable architecture
- Cost optimization
- Security hardening
- Team-level coding standards

### CI/CD Pipeline

### Stage 5 Milestone

A production-grade full stack development workflow with measurable performance, quality, and release confidence.

### Performance Budget

Set and track concrete engineering thresholds: startup latency, error budget, throughput, cost efficiency, and deployment confidence.

# Resources & Practice Questions

Verified links, self-assessment, and community follow-up

**FREE**

Full Stack Development docs and community guides

**Link:** <https://roadmap.sh/full-stack>

**FREE**

Build one portfolio project per stage before moving ahead

**Link:** <https://roadmap.sh/full-stack>

**PAID**

Structured specialization track focused on Full Stack Development

**Link:** <https://roadmap.sh/full-stack>

**FREE**

Full Stack Development roadmap reference

## Self-Assessment Practice Questions

- How would you evaluate readiness for Stage 3 in Full Stack Development?
- Which project best proves Stage 4 competency in Full Stack Development?
- What trade-offs appear in Stage 5 decisions for Full Stack Development?
