

MOBILE DEVELOPMENT

Complete Learning Roadmap

Ship high-quality mobile experiences with reliable state, performance, and release workflows.

Learning Path Overview

Five progressive stages from fundamentals to production mastery

01

Fundamentals

Mobile UI basics • Navigation patterns • State persistence • App lifecycle understanding

02

Core Concepts

Networking and caching • Offline behavior • Authentication flows • Permission handling

03

Tools and Frameworks

React Native/Flutter core tools

04

Real Projects

Social feed app • Location-based app • Offline-first notes app • Subscription flow app

05

Advanced Topics

Performance tuning • Release automation • A/B mobile experiments • Observability on mobile

How to Use This Roadmap

Build and ship first

Complete a small working project in every stage before advancing.

Use official sources

Start with the docs and use secondary resources to reinforce implementation patterns.

Iterate on projects

Refactor earlier work as you learn better architecture, testing, and performance habits.

Stages 01 & 02 - Deep Dive

Fundamentals, core concepts, and architectural foundations

01

Stage 1 - Fundamentals

Estimated: 3-4 weeks | Prerequisites: Basic foundations

Topics

- Mobile UI basics
- Navigation patterns
- State persistence
- App lifecycle understanding

Tools & Frameworks

- Mobile UI basics
- Navigation patterns
- State persistence
- App lifecycle understanding

Recommended Projects

- Mobile Development workshop using Mobile UI basics
- Mobile Development portfolio project with Navigation patterns

Stage 1 Milestone Complete Mobile Development workshop using Mobile UI basics and document the decisions, trade-offs, and validation checks before moving to Stage 2.

02

Stage 2 - Core Concepts

Estimated: 4-5 weeks | Prerequisites: Stage 1 complete

Topics

- Networking and caching
- Offline behavior
- Authentication flows
- Permission handling

Tools & Frameworks

- Networking and caching
- Offline behavior
- Authentication flows
- Permission handling

Recommended Projects

- Mobile Development workshop using Networking and caching
- Mobile Development portfolio project with Offline behavior

Stage 2 Milestone Complete Mobile Development workshop using Networking and caching and document the decisions, trade-offs, and validation checks before moving to Stage 3.

Stages 03 & 04 - Deep Dive

Modern tooling, delivery frameworks, and portfolio projects

03

Stage 3 - Tools and Frameworks

Estimated: 4-6 weeks | Prerequisites: Stage 2 complete

Topics

- React Native/Flutter core tools
- Build pipelines
- Crash reporting
- Push notification tooling

Tools & Frameworks

- React Native/Flutter core tools

Recommended Projects

- Mobile Development workshop using React Native/Flutter core tools
- Mobile Development portfolio project with Build pipelines

Stage 3 Milestone Complete Mobile Development workshop using React Native/Flutter core tools and document the decisions, trade-offs, and validation checks before moving to Stage 4.

04

Stage 4 - Real Projects

Estimated: 6-8 weeks | Prerequisites: Stage 3 complete

Topics

- Social feed app
- Location-based app
- Offline-first notes app
- Subscription flow app

Tools & Frameworks

- Social feed app
- Location-based app
- Offline-first notes app
- Subscription flow app

Recommended Projects

- Mobile Development workshop using Social feed app
- Mobile Development portfolio project with Location-based app

Stage 4 Milestone Complete Mobile Development workshop using Social feed app and document the decisions, trade-offs, and validation checks before moving to Stage 5.

Stage 05 - Advanced Topics & Delivery

Performance, architecture, release automation, and production governance

05

Stage 5 - Advanced Topics

Estimated: Ongoing | Industry-grade operating habits

Advanced Focus

- Performance tuning
- Release automation
- A/B mobile experiments
- Observability on mobile

CI/CD Pipeline

Stage 5 Milestone

A production-grade mobile development workflow with measurable performance, quality, and release confidence.

Performance Budget

Set and track concrete engineering thresholds: startup latency, error budget, throughput, cost efficiency, and deployment confidence.

Resources & Practice Questions

Verified links, self-assessment, and community follow-up

Self-Assessment Practice Questions

- How would you evaluate readiness for Stage 3 in Mobile Development?
- Which project best proves Stage 4 competency in Mobile Development?
- What trade-offs appear in Stage 5 decisions for Mobile Development?
